Are You Helping Your Preteen Cope with Type 1 Diabetes?

What
A research study to learn more about how children and families manage diabetes day-to-day. The study will focus on treatment adherence and blood glucose control.

Who
Families with a child 9 to 11 years old who has been diagnosed with Type 1 Diabetes for at least one year may be eligible to participate. (The family may include one parent, both parents or a caregiver.)

Pay
Parents will receive $20 and the child will be given a $35 gift card for time and travel at each visit.
